Features

- Protects sensor and detector bases from dust and moisture for locations where mounting requires extra protection
- Attaches to the rear of a base and forms a seal to both the base and to the wiring
- Includes a locking tab for a secure fit
- Color coordinated with base

Compatible bases

Table 1: Compatible Bases

Base	Description
4098-9682	Smoke detectors: four-wire base with relay contacts and connections for remote LED Heat detectors: four-wire base with auxiliary alarm relay output
4098-9683	Smoke detectors: two-wire base with relay and connections for remote LED Heat detectors: two-wire Base with relay
4098-9684	Heat detectors only: two-wire base with connection for remote LED
4098-9788	Smoke detectors: two-wire base with connections for Remote Alarm LED Indicator, photo and ion smoke detectors Heat detector: two-wire base, no options QuickConnect2 sensor: two-wire base, no options
4098-9789	Sensor base with connections for remote LED or unsupervised relay
4098-9791	Sensor base with connections for supervised remote relay and connections for remote alarm indicator or unsupervised relay
4098-9792	Sensor base, standard, no options
4098-9793 4098-9777	IDNet™ Addressable Isolator base
4098-9766 4098-9767	IDNet Isolator2 base
4098-9796	Dual address base for multi-sensor 4098-9754, with connections for remote LED alarm indicator or unsupervised relay

Figure 1: 4098-9848 Dust Boot, shown on base with tab inserted into locking keyway

Figure 2: 4098-9848 Dust Boot, shown on base with wires

Description

The 4098-9848 Dust Boot inserts over the rear of a Simplex sensor or detector base and creates a dust and water seal around the base wiring. The boot is rated to IP51, protection against dust limited ingress, no harmful deposit, and against vertically falling water drops, condensation.

Specifications

Table 2: Specifications

Specification	Details
Overall diameter	4 13/16 in. (122 mm)
Height	5/16 in. (8 mm)
Material	Neoprene
Color	Frost white
Installation instructions	579-912
